I CLAIM:

- 1. An African Violet plant comprising at least one leaf axil that produces more than one flower stem.
- 5 2. The African Violet plant of claim 1 wherein the leaf axil produces at least 3 flower stems.
 - 3. The African Violet plant of claim 1 wherein the leaf axil produces at least 4 flower stems.
 - 4. The African Violet plant of claim 1 wherein the plant is produced from seeds having ATCC deposit Accession No. ______.
 - 5. A method of producing an African Violet plant having at least one leaf axil with more than one flower stem and a second desirable trait, the method comprising the steps of crossing, as the male or female parent, a first African Violet plant that has at least one leaf axil with more than one flower stem, with a second African Violet plant having a second desirable trait but only 1 flower stem on any leaf axil, and selecting progeny that have at least one leaf axil with more than one flower stem and the second desirable trait.

10

- 6. The method according to claim 5, wherein the second desirable trait is selected from the group consisting of flower color, leaf color, disease resistance, leaf size and growth habit.
- 7. African Violet seeds produced by the method of claim 5, wherein the seeds produce a plant comprising at least one leaf axil that has more than one flower stem.
 - 8. A method of increasing the number of flower stems per leaf axil in a African Violet plant comprising the steps of crossing a first plant that exhibits the multiflorescence trait with a second plant that ehibits the multiflorescence trait and selecting progeny from the cross that produce more flower stems per leaf axil than either parent.
